

# CANNABINOIDS-BASED, PERSONALIZED INTEGRATIVE CARE CLINIC (PICAC) PLAN

ILYA REZNIK, M.D. MaReNa Diagnostic and Consulting Center, Bat-Yam/Tel-Aviv, Israel; [ilyarez@netvision.net.il](mailto:ilyarez@netvision.net.il)

## PATIENT'S COMPREHENSIVE GENERAL MEDICAL (AND, IF NEEDED, PSYCHOLOGICAL) CLINICAL ASSESSMENT AND EVALUATION

### Collecting thoughtful anamnesis, including personal history:

- 🌿 Current symptoms and illnesses and their functional impact.
- 🌿 Current medications, their indications and effects.
- 🌿 Relevant past illnesses.
- 🌿 Recent and impending life changes.
- 🌿 Objective measure of overall personal and social functionality.
- 🌿 Current and future living environment and its appropriateness to function and prognosis.
- 🌿 Family situation and availability.
- 🌿 Current caregiver network including its deficiencies and potential.
- 🌿 Objective measure of cognitive status.
- 🌿 Objective assessment of mobility and balance.
- 🌿 Rehabilitative status and prognosis.
- 🌿 Current emotional health and substance abuse.
- 🌿 Nutritional status and needs.
- 🌿 Disease risk factors, screening status, and health promotion activities.
- 🌿 Services required and received.
